The importance of mushrooms:

medicinal

commercial

nutritional

recreational

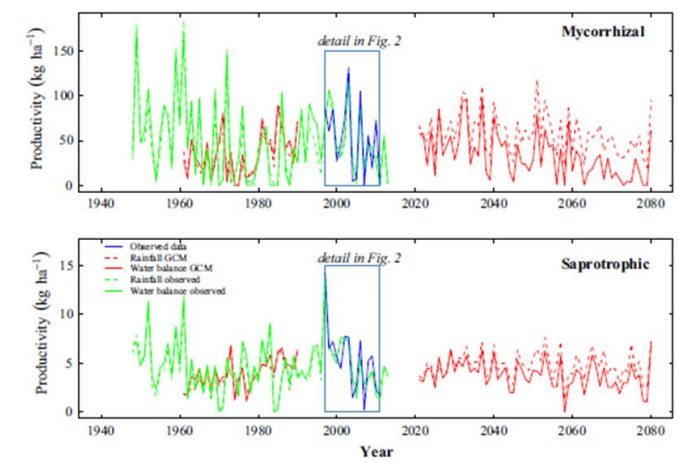

Global Change Biology

Primary Research Article

Increased evapotranspiration demand in a Mediterranean climate might cause a decline in fungal yields under global warming

Teresa Ágreda, Beatriz Águeda, José M. Olano, Sergio M. Vicente-Serrano, Marina Fernández-Toirán

First published: 30 April 2015 | <https://doi.org/10.1111/gcb.12960> | Cited by: 10

Forest Ecology and Management

Volume 402, 15 October 2017, Pages 102-114

Is silviculture able to enhance wild forest mushroom resources? Current knowledge and future perspectives

Antonio Tomao ^a, José Antonio Bonet ^{b, c}, Juan Martínez de Aragón ^c, Sergio de-Miguel ^b
